

PASTA worksheet

Stages	Sneaker company
I. Define business and security objectives	- Create profiles - Process financial transactions
II. Define the technical scope	List of technologies used by the application: • <i>Application programming interface (API)</i> • <i>Public key infrastructure (PKI)</i> • <i>SHA-256</i> • <i>SQL</i> SQL since it stores a lot of sensitive information and PKI since it is sensitive data.
III. Decompose application	Sample data flow diagram The data flow diagram shows that there is a SQL needed for searching for sneakers in the search bar.
IV. Threat analysis	Internal employees might get information about the customers. External employees might get information about the customers and the products by using SQL.
V. Vulnerability analysis	Broken API, lack of prepared statements
VI. Attack modeling	Sample attack tree diagram
VII. Risk analysis and impact	List 4 security controls that you've learned about that can reduce risk. SHA-256, incident response procedures, password policy, least privilege
